COURSE BROCHURE

Carbon Accounting and GHG Inventories (ISO 14064)

Sustainability, ESG & Net Zero

Most demanded | Rising demand 2027

Code	Duration	Formats	Language	Certificate
SU-102	5 or 10 days	Classroom, live online, in-house, blended	English or Arabic	Certificate of completion

A practical sustainability, esg and net zero course covering GHG Protocol and ISO 14064 principles, scope 1, 2 and 3 boundaries and emission factors and calculation methods. Run as a 5-day core or 10-day extended programme, in 16 cities, live online or in-house, and fully customisable for your team.

About this course

Carbon Accounting and GHG Inventories (ISO 14064) gives delegates a structured, practical understanding of GHG Protocol and ISO 14064 principles and scope 1, 2 and 3 boundaries, then builds the skills to apply emission factors and calculation methods, building a GHG inventory and verification and reporting in real work. Sessions are led by practitioners with at least 15 years in the field.

What you will learn

- GHG Protocol and ISO 14064 principles
- Scope 1, 2 and 3 boundaries
- Emission factors and calculation methods
- Building a GHG inventory
- Verification and reporting

Who should attend

Sustainability, HSE, finance, strategy and reporting professionals, and managers responsible for ESG and climate targets.

5-day course outline

Day 1	**GHG Protocol and ISO 14064 principles**	Concepts, standards and terminology, with a diagnostic exercise to baseline the group.
Day 2	**Scope 1, 2 and 3 boundaries**	Methods and tools explained step by step, with worked examples from real operations.
Day 3	**Emission factors and calculation methods**	Hands-on practice in small groups using realistic data, cases and templates.
Day 4	**Building a GHG inventory**	Case studies of successes and failures, and how to apply the lessons in your organisation.
Day 5	**Verification and reporting**	Integration exercise, final knowledge check and a personal action plan.

10-day extended programme

Includes the full 5-day outline, plus a second week of applied work:

Day 6	**Applied workshop: GHG Protocol and ISO 14064 principles** — Deeper practice with your own data or site examples.
Day 7	**Applied workshop: Scope 1, 2 and 3 boundaries and emission factors and calculation methods** — Group exercises that combine methods from week one.
Day 8	**Field case study: Building a GHG inventory** — A detailed industry case worked through from start to finish.
Day 9	**Advanced practice: Verification and reporting** — Tools, templates and checklists to take back to work.
Day 10	**Assessed project and presentation** — Each delegate presents an improvement plan and completes the final assessment.

Upcoming classroom dates

More dates, cities and live online sessions on request.

Dates	City	Length	Fee per delegate
