COURSE BROCHURE

Circular Economy and Waste Management

Sustainability, ESG & Net Zero

Rising demand 2028

Code	Duration	Formats	Language	Certificate
SU-106	5 or 10 days	Classroom, live online, in-house, blended	English or Arabic	Certificate of completion

A practical sustainability, esg and net zero course covering circular economy principles, waste hierarchy and waste management and product design for circularity. Run as a 5-day core or 10-day extended programme, in 16 cities, live online or in-house, and fully customisable for your team.

About this course

Circular Economy and Waste Management gives delegates a structured, practical understanding of circular economy principles and waste hierarchy and waste management, then builds the skills to apply product design for circularity, industrial symbiosis and recycling and circular business models in real work. Sessions are led by practitioners with at least 15 years in the field.

Who should attend

Sustainability, HSE, finance, strategy and reporting professionals, and managers responsible for ESG and climate targets.

What you will learn

- Circular economy principles
- Waste hierarchy and waste management
- Product design for circularity
- Industrial symbiosis and recycling
- Circular business models

5-day course outline

Day 1	**Circular economy principles**	Concepts, standards and terminology, with a diagnostic exercise to baseline the group.
Day 2	**Waste hierarchy and waste management**	Methods and tools explained step by step, with worked examples from real operations.
Day 3	**Product design for circularity**	Hands-on practice in small groups using realistic data, cases and templates.
Day 4	**Industrial symbiosis and recycling**	Case studies of successes and failures, and how to apply the lessons in your organisation.
Day 5	**Circular business models**	Integration exercise, final knowledge check and a personal action plan.

10-day extended programme

Includes the full 5-day outline, plus a second week of applied work:

Day 6	**Applied workshop: Circular economy principles** — Deeper practice with your own data or site examples.
Day 7	**Applied workshop: Waste hierarchy and waste management and product design for circularity** — Group exercises that combine methods from week one.
Day 8	**Field case study: Industrial symbiosis and recycling** — A detailed industry case worked through from start to finish.
Day 9	**Advanced practice: Circular business models** — Tools, templates and checklists to take back to work.
Day 10	**Assessed project and presentation** — Each delegate presents an improvement plan and completes the final assessment.
