A practical oil, gas and petrochemicals course covering late-life asset strategy and cessation of production, decommissioning regulations and planning and well plugging and abandonment. Run as a 5-day core or 10-day extended programme, in 16 cities, live online or in-house, and fully customisable for your team.

About this course

Decommissioning and Late-Life Asset Management gives delegates a structured, practical understanding of late-life asset strategy and cessation of production and decommissioning regulations and planning, then builds the skills to apply well plugging and abandonment, removal, reuse and recycling options and cost estimation and risk in real work. Sessions are led by practitioners with at least 15 years in the field.

Who should attend

Engineers, operators, supervisors and technical staff in upstream, midstream, refining and petrochemical operations.

What you will learn

- Late-life asset strategy and cessation of production

5-day course outline

Day 1	**Late-life asset strategy and cessation of production**	Concepts, standards and terminology, with a diagnostic exercise to baseline the group.
Day 2	**Decommissioning regulations and planning**	Methods and tools explained step by step, with worked examples from real operations.
Day 3	**Well plugging and abandonment**	Hands-on practice in small groups using realistic data, cases and templates.
Day 4	**Removal, reuse and recycling options**	Case studies of successes and failures, and how to apply the lessons in your organisation.
Day 5	**Cost estimation and risk**	Integration exercise, final knowledge check and a personal action plan.

10-day extended programme

Includes the full 5-day outline, plus a second week of applied work:

Day 6	**Applied workshop: Late-life asset strategy and cessation of production** — Deeper practice with your own data or site examples.
Day 7	**Applied workshop: Decommissioning regulations and planning and well plugging and abandonment** — Group exercises that combine methods from week one.
Day 8	**Field case study: Removal, reuse and recycling options** — A detailed industry case worked through from start to finish.
Day 9	**Advanced practice: Cost estimation and risk** — Tools, templates and checklists to take back to work.
Day 10	**Assessed project and presentation** — Each delegate presents an improvement plan and completes the final assessment.
