About this course

Cloud Computing Fundamentals (AWS and Azure) gives delegates a structured, practical understanding of cloud computing concepts and AWS and Azure core services, then builds the skills to apply cloud architecture, cloud security and cost management in real work. Sessions are led by practitioners with at least 15 years in the field.

What you will learn

- Cloud computing concepts
- AWS and Azure core services
- Cloud architecture
- Cloud security
- Cost management

Who should attend

Managers, analysts, IT and OT professionals, and anyone leading or adopting digital and AI initiatives.

5-day course outline

Day 1	**Cloud computing concepts**	Concepts, standards and terminology, with a diagnostic exercise to baseline the group.
Day 2	**AWS and Azure core services**	Methods and tools explained step by step, with worked examples from real operations.
Day 3	**Cloud architecture**	Hands-on practice in small groups using realistic data, cases and templates.
Day 4	**Cloud security**	Case studies of successes and failures, and how to apply the lessons in your organisation.
Day 5	**Cost management**	Integration exercise, final knowledge check and a personal action plan.

10-day extended programme

Includes the full 5-day outline, plus a second week of applied work:

Day 6	**Applied workshop: Cloud computing concepts** — Deeper practice with your own data or site examples.
Day 7	**Applied workshop: AWS and Azure core services and cloud architecture** — Group exercises that combine methods from week one.
Day 8	**Field case study: Cloud security** — A detailed industry case worked through from start to finish.
Day 9	**Advanced practice: Cost management** — Tools, templates and checklists to take back to work.
Day 10	**Assessed project and presentation** — Each delegate presents an improvement plan and completes the final assessment.
