Procurement & Supply Chain

Rising demand 2028

Code	Duration	Formats	Language	Certificate
SC-108	5 or 10 days	Classroom, live online, in-house, blended	English or Arabic	Certificate of completion

A practical procurement and supply chain course covering the digital supply chain, AI-based demand forecasting and end-to-end visibility tools. Run as a 5-day core or 10-day extended programme, in 16 cities, live online or in-house, and fully customisable for your team.

About this course

Digital Supply Chain and AI Demand Forecasting gives delegates a structured, practical understanding of the digital supply chain and AI-based demand forecasting, then builds the skills to apply end-to-end visibility tools, automation in planning and execution and implementing digital supply chain projects in real work. Sessions are led by practitioners with at least 15 years in the field.

What you will learn

- The digital supply chain
- AI-based demand forecasting
- End-to-end visibility tools
- Automation in planning and execution
- Implementing digital supply chain projects

Who should attend

Procurement, logistics, warehouse, contracts and supply chain professionals.

5-day course outline

Day 1	**The digital supply chain**	Concepts, standards and terminology, with a diagnostic exercise to baseline the group.
Day 2	**AI-based demand forecasting**	Methods and tools explained step by step, with worked examples from real operations.
Day 3	**End-to-end visibility tools**	Hands-on practice in small groups using realistic data, cases and templates.
Day 4	**Automation in planning and execution**	Case studies of successes and failures, and how to apply the lessons in your organisation.
Day 5	**Implementing digital supply chain projects**	Integration exercise, final knowledge check and a personal action plan.

10-day extended programme

Includes the full 5-day outline, plus a second week of applied work:

Day 6	**Applied workshop: The digital supply chain** — Deeper practice with your own data or site examples.
Day 7	**Applied workshop: AI-based demand forecasting and end-to-end visibility tools** — Group exercises that combine methods from week one.
Day 8	**Field case study: Automation in planning and execution** — A detailed industry case worked through from start to finish.
Day 9	**Advanced practice: Implementing digital supply chain projects** — Tools, templates and checklists to take back to work.
Day 10	**Assessed project and presentation** — Each delegate presents an improvement plan and completes the final assessment.
