COURSE BROCHURE

Green Building and Sustainable Facilities

Sustainability, ESG & Net Zero

Rising demand 2027

Code	Duration	Formats	Language	Certificate
SU-107	5 or 10 days	Classroom, live online, in-house, blended	English or Arabic	Certificate of completion

A practical sustainability, esg and net zero course covering green building rating systems, energy and water efficiency in buildings and materials and indoor environment. Run as a 5-day core or 10-day extended programme, in 16 cities, live online or in-house, and fully customisable for your team.

About this course

Green Building and Sustainable Facilities gives delegates a structured, practical understanding of green building rating systems and energy and water efficiency in buildings, then builds the skills to apply materials and indoor environment, sustainable facility operations and certification process in real work. Sessions are led by practitioners with at least 15 years in the field.

Who should attend

Sustainability, HSE, finance, strategy and reporting professionals, and managers responsible for ESG and climate targets.

What you will learn

- Green building rating systems
- Energy and water efficiency in buildings
- Materials and indoor environment
- Sustainable facility operations
- Certification process

5-day course outline

Day 1	**Green building rating systems**	Concepts, standards and terminology, with a diagnostic exercise to baseline the group.
Day 2	**Energy and water efficiency in buildings**	Methods and tools explained step by step, with worked examples from real operations.
Day 3	**Materials and indoor environment**	Hands-on practice in small groups using realistic data, cases and templates.
Day 4	**Sustainable facility operations**	Case studies of successes and failures, and how to apply the lessons in your organisation.
Day 5	**Certification process**	Integration exercise, final knowledge check and a personal action plan.

10-day extended programme

Includes the full 5-day outline, plus a second week of applied work:

Day 6	**Applied workshop: Green building rating systems** — Deeper practice with your own data or site examples.
Day 7	**Applied workshop: Energy and water efficiency in buildings and materials and indoor environment** — Group exercises that combine methods from week one.
Day 8	**Field case study: Sustainable facility operations** — A detailed industry case worked through from start to finish.
Day 9	**Advanced practice: Certification process** — Tools, templates and checklists to take back to work.
Day 10	**Assessed project and presentation** — Each delegate presents an improvement plan and completes the final assessment.
