COURSE BROCHURE

Human Factors in Safety

Health, Safety & Environment

Code	Duration	Formats	Language	Certificate
HS-111	**5 or 10 days**	**Classroom, live online, in-house, blended**	**English or Arabic**	**Certificate of completion**

A practical health, safety and environment course covering human factors fundamentals, human error types and fatigue, workload and communication. Run as a 5-day core or 10-day extended programme, in 16 cities, live online or in-house, and fully customisable for your team.

About this course

Human Factors in Safety gives delegates a structured, practical understanding of human factors fundamentals and human error types, then builds the skills to apply fatigue, workload and communication, designing for human reliability and human factors in investigations in real work. Sessions are led by practitioners with at least 15 years in the field.

Who should attend

HSE professionals, supervisors, engineers, auditors and line managers responsible for safe operations.

What you will learn

- Human factors fundamentals
- Human error types
- Fatigue, workload and communication
- Designing for human reliability
- Human factors in investigations

5-day course outline

Day 1	**Human factors fundamentals**	Concepts, standards and terminology, with a diagnostic exercise to baseline the group.
Day 2	**Human error types**	Methods and tools explained step by step, with worked examples from real operations.
Day 3	**Fatigue, workload and communication**	Hands-on practice in small groups using realistic data, cases and templates.
Day 4	**Designing for human reliability**	Case studies of successes and failures, and how to apply the lessons in your organisation.
Day 5	**Human factors in investigations**	Integration exercise, final knowledge check and a personal action plan.

10-day extended programme

Includes the full 5-day outline, plus a second week of applied work:

Day 6	**Applied workshop: Human factors fundamentals** — Deeper practice with your own data or site examples.
Day 7	**Applied workshop: Human error types and fatigue, workload and communication** — Group exercises that combine methods from week one.
Day 8	**Field case study: Designing for human reliability** — A detailed industry case worked through from start to finish.
Day 9	**Advanced practice: Human factors in investigations** — Tools, templates and checklists to take back to work.
Day 10	**Assessed project and presentation** — Each delegate presents an improvement plan and completes the final assessment.
