COURSE BROCHURE

Financial Modelling and Valuation

Finance & Accounting

Code	Duration	Formats	Language	Certificate
FA-105	**5 or 10 days**	**Classroom, live online, in-house, blended**	**English or Arabic**	**Certificate of completion**

A practical finance and accounting course covering structuring clear, auditable Excel models, revenue, cost and cash flow forecasting and DCF, multiples and other valuation methods. Run as a 5-day core or 10-day extended programme, in 16 cities, live online or in-house, and fully customisable for your team.

About this course

Financial Modelling and Valuation gives delegates a structured, practical understanding of structuring clear, auditable Excel models and revenue, cost and cash flow forecasting, then builds the skills to apply DCF, multiples and other valuation methods, scenario and sensitivity analysis and presenting model results to decision makers in real work. Sessions are led by practitioners with at least 15 years in the field.

What you will learn

- Structuring clear, auditable Excel models
- Revenue, cost and cash flow forecasting
- DCF, multiples and other valuation methods
- Scenario and sensitivity analysis
- Presenting model results to decision makers

Who should attend

Accountants, finance managers, auditors, analysts and non-finance managers who own budgets.

5-day course outline

Day 1	**Structuring clear, auditable Excel models**	Concepts, standards and terminology, with a diagnostic exercise to baseline the group.
Day 2	**Revenue, cost and cash flow forecasting**	Methods and tools explained step by step, with worked examples from real operations.
Day 3	**DCF, multiples and other valuation methods**	Hands-on practice in small groups using realistic data, cases and templates.
Day 4	**Scenario and sensitivity analysis**	Case studies of successes and failures, and how to apply the lessons in your organisation.
Day 5	**Presenting model results to decision makers**	Integration exercise, final knowledge check and a personal action plan.

10-day extended programme

Includes the full 5-day outline, plus a second week of applied work:

Day 6	**Applied workshop: Structuring clear, auditable Excel models** — Deeper practice with your own data or site examples.
Day 7	**Applied workshop: Revenue, cost and cash flow forecasting and DCF, multiples and other valuation methods** — Group exercises that combine methods from week one.
Day 8	**Field case study: Scenario and sensitivity analysis** — A detailed industry case worked through from start to finish.
Day 9	**Advanced practice: Presenting model results to decision makers** — Tools, templates and checklists to take back to work.
Day 10	**Assessed project and presentation** — Each delegate presents an improvement plan and completes the final assessment.

Upcoming classroom dates

More dates, cities and live online sessions on request.
