COURSE BROCHURE

Fire Safety and Emergency Response

Health, Safety & Environment

Code	Duration	Formats	Language	Certificate
HS-106	**5 or 10 days**	**Classroom, live online, in-house, blended**	**English or Arabic**	**Certificate of completion**

A practical health, safety and environment course covering fire science and fire hazards, fire prevention and protection systems and emergency response planning. Run as a 5-day core or 10-day extended programme, in 16 cities, live online or in-house, and fully customisable for your team.

About this course

Fire Safety and Emergency Response gives delegates a structured, practical understanding of fire science and fire hazards and fire prevention and protection systems, then builds the skills to apply emergency response planning, evacuation and drills and incident command in real work. Sessions are led by practitioners with at least 15 years in the field.

Who should attend

HSE professionals, supervisors, engineers, auditors and line managers responsible for safe operations.

What you will learn

- Fire science and fire hazards
- Fire prevention and protection systems
- Emergency response planning
- Evacuation and drills
- Incident command

5-day course outline

Day 1	**Fire science and fire hazards**	Concepts, standards and terminology, with a diagnostic exercise to baseline the group.
Day 2	**Fire prevention and protection systems**	Methods and tools explained step by step, with worked examples from real operations.
Day 3	**Emergency response planning**	Hands-on practice in small groups using realistic data, cases and templates.
Day 4	**Evacuation and drills**	Case studies of successes and failures, and how to apply the lessons in your organisation.
Day 5	**Incident command**	Integration exercise, final knowledge check and a personal action plan.

10-day extended programme

Includes the full 5-day outline, plus a second week of applied work:

Day 6	**Applied workshop: Fire science and fire hazards** — Deeper practice with your own data or site examples.
Day 7	**Applied workshop: Fire prevention and protection systems and emergency response planning** — Group exercises that combine methods from week one.
Day 8	**Field case study: Evacuation and drills** — A detailed industry case worked through from start to finish.
Day 9	**Advanced practice: Incident command** — Tools, templates and checklists to take back to work.
Day 10	**Assessed project and presentation** — Each delegate presents an improvement plan and completes the final assessment.

Upcoming classroom dates

More dates, cities and live online sessions on request.
