COURSE BROCHURE

Flare and Methane Emissions Reduction

Oil, Gas & Petrochemicals

Rising demand 2027

Code	Duration	Formats	Language	Certificate
OG-111	**5 or 10 days**	**Classroom, live online, in-house, blended**	**English or Arabic**	**Certificate of completion**

A practical oil, gas and petrochemicals course covering sources of methane and flare emissions, measurement, detection and quantification and flare minimisation and gas recovery. Run as a 5-day core or 10-day extended programme, in 16 cities, live online or in-house, and fully customisable for your team.

About this course

Flare and Methane Emissions Reduction gives delegates a structured, practical understanding of sources of methane and flare emissions and measurement, detection and quantification, then builds the skills to apply flare minimisation and gas recovery, leak detection and repair programmes and regulations and reporting frameworks in real work. Sessions are led by practitioners with at least 15 years in the field.

What you will learn

- Sources of methane and flare emissions
- Measurement, detection and quantification
- Flare minimisation and gas recovery
- Leak detection and repair programmes
- Regulations and reporting frameworks

Who should attend

Engineers, operators, supervisors and technical staff in upstream, midstream, refining and petrochemical operations.

5-day course outline

Day 1	**Sources of methane and flare emissions**	Concepts, standards and terminology, with a diagnostic exercise to baseline the group.
Day 2	**Measurement, detection and quantification**	Methods and tools explained step by step, with worked examples from real operations.
Day 3	**Flare minimisation and gas recovery**	Hands-on practice in small groups using realistic data, cases and templates.
Day 4	**Leak detection and repair programmes**	Case studies of successes and failures, and how to apply the lessons in your organisation.
Day 5	**Regulations and reporting frameworks**	Integration exercise, final knowledge check and a personal action plan.

10-day extended programme

Includes the full 5-day outline, plus a second week of applied work:

Day 6	**Applied workshop: Sources of methane and flare emissions** — Deeper practice with your own data or site examples.
Day 7	**Applied workshop: Measurement, detection and quantification and flare minimisation and gas recovery** — Group exercises that combine methods from week one.
Day 8	**Field case study: Leak detection and repair programmes** — A detailed industry case worked through from start to finish.
Day 9	**Advanced practice: Regulations and reporting frameworks** — Tools, templates and checklists to take back to work.
Day 10	**Assessed project and presentation** — Each delegate presents an improvement plan and completes the final assessment.

Upcoming classroom dates

More dates, cities and live online sessions on request.

Dates	City	Length	Fee per delegate
16 Nov 2026 to 20 Nov 2026	London	5 days	**$3,450**
14 Dec 2026 to 18 Dec 2026	Kuala Lumpur	5 days	**$2,450**
11 Jan 2027 to 22 Jan 2027	Istanbul	10 days	**$4,450**
1 Feb 2027 to 12 Feb 2027	Kuala Lumpur	10 days	**$4,450**
14 Mar 2027 to 18 Mar 2027	Riyadh	5 days	**$2,450**

Fees per delegate (2026 to 2027)

Format	5 days	10 days
Classroom: Dubai, Istanbul, Cairo, Kuala Lumpur	**$2,450**	**$4,450**
Classroom: London, Europe, Singapore	**$3,450**	**$6,250**
Live online	**$1,450**	**$2,650**
In-house, group of up to 15	**From $12,900**	**From $23,500**

Classroom fees include tuition, materials, lunch and refreshments, and a certificate. 10% group saving for 3 delegates, 15% for 5 or more.

Tailored to your team

Change the level, language, length (1 to 20 days) and format, add topics from other courses or entirely new topics, and include your own case studies, site visits or exam preparation. Build it online for an instant indicative fee.
