A practical oil, gas and petrochemicals course covering process safety fundamentals and major accident hazards, the 14 elements of PSM and management of change and pre-startup reviews. Run as a 5-day core or 10-day extended programme, in 16 cities, live online or in-house, and fully customisable for your team.

About this course

Process Safety Management gives delegates a structured, practical understanding of process safety fundamentals and major accident hazards and the 14 elements of PSM, then builds the skills to apply management of change and pre-startup reviews, mechanical integrity and safe operating limits and process safety performance indicators in real work. Sessions are led by practitioners with at least 15 years in the field.

What you will learn

- Process safety fundamentals and major accident hazards
- The 14 elements of PSM
- Management of change and pre-startup reviews
- Mechanical integrity and safe operating limits
- Process safety performance indicators

Who should attend

Engineers, operators, supervisors and technical staff in upstream, midstream, refining and petrochemical operations.

5-day course outline

Day 1	**Process safety fundamentals and major accident hazards**	Concepts, standards and terminology, with a diagnostic exercise to baseline the group.
Day 2	**The 14 elements of PSM**	Methods and tools explained step by step, with worked examples from real operations.
Day 3	**Management of change and pre-startup reviews**	Hands-on practice in small groups using realistic data, cases and templates.
Day 4	**Mechanical integrity and safe operating limits**	Case studies of successes and failures, and how to apply the lessons in your organisation.
Day 5	**Process safety performance indicators**	Integration exercise, final knowledge check and a personal action plan.

10-day extended programme

Includes the full 5-day outline, plus a second week of applied work:

Day 6	**Applied workshop: Process safety fundamentals and major accident hazards** — Deeper practice with your own data or site examples.
Day 7	**Applied workshop: The 14 elements of PSM and management of change and pre-startup reviews** — Group exercises that combine methods from week one.
Day 8	**Field case study: Mechanical integrity and safe operating limits** — A detailed industry case worked through from start to finish.
Day 9	**Advanced practice: Process safety performance indicators** — Tools, templates and checklists to take back to work.
Day 10	**Assessed project and presentation** — Each delegate presents an improvement plan and completes the final assessment.
