COURSE BROCHURE

Occupational Health and Safety Management (ISO 45001)

Health, Safety & Environment

Most demanded

Code	Duration	Formats	Language	Certificate
HS-109	5 or 10 days	Classroom, live online, in-house, blended	English or Arabic	Certificate of completion

A practical health, safety and environment course covering ISO 45001 structure and requirements, worker participation and consultation and hazard identification and risk. Run as a 5-day core or 10-day extended programme, in 16 cities, live online or in-house, and fully customisable for your team.

About this course

Occupational Health and Safety Management (ISO 45001) gives delegates a structured, practical understanding of ISO 45001 structure and requirements and worker participation and consultation, then builds the skills to apply hazard identification and risk, operational controls and performance evaluation and implementation and certification in real work. Sessions are led by practitioners with at least 15 years in the field.

What you will learn

- ISO 45001 structure and requirements
- Worker participation and consultation
- Hazard identification and risk
- Operational controls and performance evaluation
- Implementation and certification

Who should attend

HSE professionals, supervisors, engineers, auditors and line managers responsible for safe operations.

5-day course outline

Day 1	**ISO 45001 structure and requirements**	Concepts, standards and terminology, with a diagnostic exercise to baseline the group.
Day 2	**Worker participation and consultation**	Methods and tools explained step by step, with worked examples from real operations.
Day 3	**Hazard identification and risk**	Hands-on practice in small groups using realistic data, cases and templates.
Day 4	**Operational controls and performance evaluation**	Case studies of successes and failures, and how to apply the lessons in your organisation.
Day 5	**Implementation and certification**	Integration exercise, final knowledge check and a personal action plan.

10-day extended programme

Includes the full 5-day outline, plus a second week of applied work:

Day 6	**Applied workshop: ISO 45001 structure and requirements** — Deeper practice with your own data or site examples.
Day 7	**Applied workshop: Worker participation and consultation and hazard identification and risk** — Group exercises that combine methods from week one.
Day 8	**Field case study: Operational controls and performance evaluation** — A detailed industry case worked through from start to finish.
Day 9	**Advanced practice: Implementation and certification** — Tools, templates and checklists to take back to work.
Day 10	**Assessed project and presentation** — Each delegate presents an improvement plan and completes the final assessment.

Upcoming classroom dates

More dates, cities and live online sessions on request.
