Robotic Process Automation

Digital, AI & Cybersecurity

Rising demand 2027

Code	Duration	Formats	Language	Certificate
DT-112	5 or 10 days	Classroom, live online, in-house, blended	English or Arabic	Certificate of completion

A practical digital, ai and cybersecurity course covering RPA concepts and tools, selecting processes to automate and designing and building bots. Run as a 5-day core or 10-day extended programme, in 16 cities, live online or in-house, and fully customisable for your team.

About this course

Robotic Process Automation gives delegates a structured, practical understanding of RPA concepts and tools and selecting processes to automate, then builds the skills to apply designing and building bots, governance and controls and scaling automation in real work. Sessions are led by practitioners with at least 15 years in the field.

Who should attend

Managers, analysts, IT and OT professionals, and anyone leading or adopting digital and AI initiatives.

What you will learn

- RPA concepts and tools
- Selecting processes to automate
- Designing and building bots
- Governance and controls
- Scaling automation

5-day course outline

Day 1	**RPA concepts and tools**	Concepts, standards and terminology, with a diagnostic exercise to baseline the group.
Day 2	**Selecting processes to automate**	Methods and tools explained step by step, with worked examples from real operations.
Day 3	**Designing and building bots**	Hands-on practice in small groups using realistic data, cases and templates.
Day 4	**Governance and controls**	Case studies of successes and failures, and how to apply the lessons in your organisation.
Day 5	**Scaling automation**	Integration exercise, final knowledge check and a personal action plan.

10-day extended programme

Includes the full 5-day outline, plus a second week of applied work:

Day 6	**Applied workshop: RPA concepts and tools** — Deeper practice with your own data or site examples.
Day 7	**Applied workshop: Selecting processes to automate and designing and building bots** — Group exercises that combine methods from week one.
Day 8	**Field case study: Governance and controls** — A detailed industry case worked through from start to finish.
Day 9	**Advanced practice: Scaling automation** — Tools, templates and checklists to take back to work.
Day 10	**Assessed project and presentation** — Each delegate presents an improvement plan and completes the final assessment.
