COURSE BROCHURE

Warehouse and Inventory Management

Procurement & Supply Chain

Most demanded

Code	Duration	Formats	Language	Certificate
SC-102	5 or 10 days	Classroom, live online, in-house, blended	English or Arabic	Certificate of completion

A practical procurement and supply chain course covering warehouse layout and design, inventory policies and classification and stock control, counts and accuracy. Run as a 5-day core or 10-day extended programme, in 16 cities, live online or in-house, and fully customisable for your team.

About this course

Warehouse and Inventory Management gives delegates a structured, practical understanding of warehouse layout and design and inventory policies and classification, then builds the skills to apply stock control, counts and accuracy, warehouse performance KPIs and warehouse management systems and automation in real work. Sessions are led by practitioners with at least 15 years in the field.

What you will learn

- Warehouse layout and design
- Inventory policies and classification
- Stock control, counts and accuracy
- Warehouse performance KPIs
- Warehouse management systems and automation

Who should attend

Procurement, logistics, warehouse, contracts and supply chain professionals.

5-day course outline

Day 1	**Warehouse layout and design**	Concepts, standards and terminology, with a diagnostic exercise to baseline the group.
Day 2	**Inventory policies and classification**	Methods and tools explained step by step, with worked examples from real operations.
Day 3	**Stock control, counts and accuracy**	Hands-on practice in small groups using realistic data, cases and templates.
Day 4	**Warehouse performance KPIs**	Case studies of successes and failures, and how to apply the lessons in your organisation.
Day 5	**Warehouse management systems and automation**	Integration exercise, final knowledge check and a personal action plan.

10-day extended programme

Includes the full 5-day outline, plus a second week of applied work:

Day 6	**Applied workshop: Warehouse layout and design** — Deeper practice with your own data or site examples.
Day 7	**Applied workshop: Inventory policies and classification and stock control, counts and accuracy** — Group exercises that combine methods from week one.
Day 8	**Field case study: Warehouse performance KPIs** — A detailed industry case worked through from start to finish.
Day 9	**Advanced practice: Warehouse management systems and automation** — Tools, templates and checklists to take back to work.
Day 10	**Assessed project and presentation** — Each delegate presents an improvement plan and completes the final assessment.
